

# Our paper business > Eucalyptus globulus vs. other short fibres

## Amount and length of fibres

Other short fibre = longer fibre

Eucalyptus globulus = shorter fibre  
= high number of fibre per unit weight

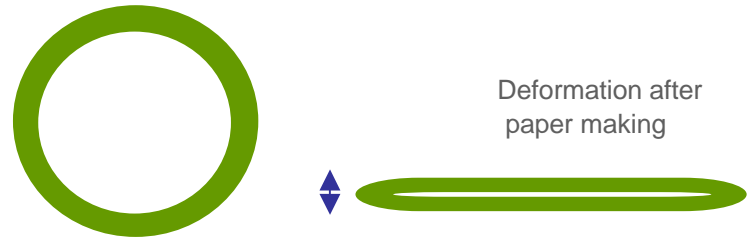

Advantages Eucalyptus globulus for the paper quality :

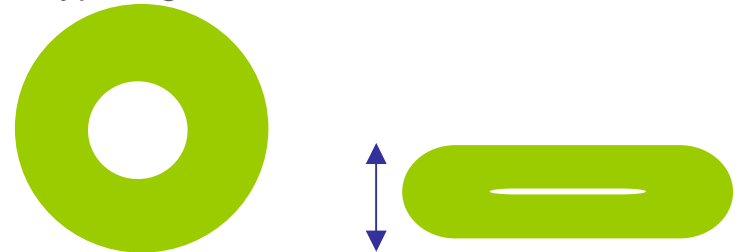

- **Good porosity**
- **Good opacity**
- **Good formation**

## Cell wall thickness

Other short fibre = less cell wall thickness

Eucalyptus globulus = thick cell wall

Advantages Eucalyptus globulus for the runnability:

- **High stiffness**
- **High bulk**
- **High dimensional stability**
